

Electronic Service Control Version 8

ESC Peachtree Server Upgrade Guide

Upgrade Directions

Before You Begin

When integrating with Peachtree, Electronic Service Control - Version 8 requires Peachtree users to upgrade to Peachtree 2006 Complete or Premium. Due to changes made to the Peachtree database structure, previous versions of Peachtree will not properly integrate with Version 8.

Before you proceed, please make sure that you update all installations of Peachtree to the 2006 version first.

Download New Version

Before you can update your ESC Peachtree Server you must first download the latest version. This can be accomplished by completing the following directions.

1. Open your Internet Browser and go to the following site:
<http://www.coastalcomputercorporation.com/html/updates80.html>
2. When prompted for a password, enter the word **power** in all lowercase letters.
3. Click the **Download** button on the **ESC Peachtree Server** line.

4. Click **Save** to copy the program to your computer.
5. Note the name of the file and the location where it will be saved in the spaces provided below before clicking **Save** again.

File Name _____
Location _____

Uninstall Previous Version

You are now ready to uninstall the previous version of the ESC Peachtree Server. It is completely safe and will not affect your data in any way.

1. Exit all programs on the computer running the ESC Peachtree Server.
2. Click **Start | Control Panel**.
3. Select **Add or Remove Programs** from the resulting list.
4. Highlight **ESC Peachtree Server** from the list of available programs and click **Remove**. Select **Yes** to uninstall the software.

Install the Update

1. On the same computer, locate and double-click the file you downloaded to start the installation.
2. Accept all the defaults during the installation. Click the **Finish** button to complete the installation.
3. Restart the *ESC Peachtree Server* and resume normal operations.
